**Starting Formulation**

**SF 4002 High Cure Adhesive 8021 3271 High Strength, Room Temperature Cure Adhesive**

**Introduction** This moderate reactivity, filled epoxy adhesive is a general purpose formulation characterized by development of high bond strength to a variety of substrates including metals, plastics, concrete, and glass.

**Suggested Uses** General purpose bonding of
- Metals
- Concrete
- Glass and many rigid plastics

**Features**
- Moderate gel times, 15-20 minutes for 100 grams
- High Lap shear strength
- Bonds to damp concrete
- Medium viscosity thixotropic liquid

**Formula**

**Mixing Instructions**
Disperse the Cab-O-Sil M-5 into a portion of the EPON Resin 8021 using a Cowles Dissolver, 3-roll mill, or other suitable high shear dispersing technique. Add the remaining EPON Resin 8021 and the Novacite 1250 to the resulting dispersion and mix, using conventional mixing equipment, until all of the Novacite 1250 has been wetted and a uniform consistency is attained.

Filler types such as aluminum powder, talc, alumina, wollastonite, and calcium carbonate may be used.

Modification with silane coupling agents, such as Z-6040 Epoxy Silane from Dow-Corning, improves bonds to concrete and glass.
Pigment may be incorporated into either or both portions for purposes of color coding.

</tbody>
</table>

Application Instructions
Surfaces to be bonded should be clean and free of dust, dirt, greases, or other extraneous material. Mix the adhesive components and apply immediately by spreading the material in a thin film over the surface to be bonded. Maintain light pressure during cure to achieve the best bond.

General Information

These are starting formulations and are not proven in the user’s particular application but are simply meant to demonstrate the efficacy of the products and to assist in the development of the user’s own formulation. It is the user’s responsibility to fully-test and qualify the formulation, along with the ingredients, methods, applications or equipment identified herein (“Information”), by the user’s knowledgeable formulator or scientist, and to determine the appropriate use conditions and legal restrictions, prior to use of any Information.

Safety, Storage & Handling

Please refer to the MSDS for the most current Safety and Handling information.

Exposure to these materials should be minimized and avoided, if feasible, through the observance of proper precautions, use of appropriate engineering controls and proper personal protective clothing and equipment, and adherence to proper handling procedures. None of these materials should be used, stored, or transported until the handling precautions and recommendations as stated in the Material Safety Data Sheet (MSDS) for these and all other products being used are understood by all persons who will work with them. Questions and requests for information on Hexion Inc. (“Hexion”) products should be directed to your Hexion sales representative, or the nearest Hexion sales office. Information and MSDSs on non-Hexion products should be obtained from the respective manufacturer.
