Starting Formulation

SF 2004
Clear Baking Coating
EPON™ Resin 1007F / Beetle 227-8

Features
• Good initial color and color retention
• Superior to Formulation No. 2002 in flexibility, exterior durability and package stability

Slowly add the following with constant mixing,

|        | EPON Resin 1007F      | Hexion                | 230.8  | 23.28   |

Mix until clear solution, then add

|        | Beetle 227-8          | Cytec Industries Inc. | 198.1  | 23.85   |
|        | Ethyl 3-ethoxy propionate |                    | 24.7   | 3.15    |
|        | Xylene                |                      | 24.7   | 3.44    |

Total Part A 824.5 23.85

Mixing Instructions

Prepare the EPON Resin 1007F solution (40% nonvolatile in ethyl 3-ethoxy propionate/xylene, 1/1 by weight) called for in the formula. This is most easily accomplished by charging the solvents in a suitable container and slowly adding the EPON Resin 1007F under constant agitation. When the EPON Resin 1007F is completely dissolved, mix the Beetle 227-8 and remaining solvents.

Typical Handling
For spray application, reduce the formulation to a No. 4 Ford Cup viscosity of 20 seconds with diacetone alcohol/xylene, 1/1 by weight.

This coating should be baked for 20 minutes at 385 °F.

General Information
These are starting formulations and are not proven in the user’s particular application but are simply meant to demonstrate the efficacy of the products and to assist in the development of the user’s own formulation. It is the user’s responsibility to fully-test and qualify the formulation, along with the ingredients, methods, applications or equipment identified herein (“Information”), by the user’s knowledgeable formulator or scientist, and to determine the appropriate use conditions and legal restrictions, prior to use of any Information.

Safety, Storage & Handling
Please refer to the MSDS for the most current Safety and Handling information.

Exposure to these materials should be minimized and avoided, if feasible, through the observance of proper precautions, use of appropriate engineering controls and proper personal protective clothing and equipment, and adherence to proper handling procedures. None of these materials should be used, stored, or transported until the handling precautions and recommendations as stated in the Material Safety Data Sheet (MSDS) for these and all other products being used are understood by all persons who will work with them. Questions and requests for information on Hexion Inc. (“Hexion”) products should be directed to your Hexion sales representative, or the nearest Hexion sales office. Information and MSDSs on non-Hexion products should be obtained from the respective manufacturer.
