Starting Formulation

SF 4020 One-Package Cure Adhesive 828 One-Package Rapid Cure Adhesive
EPON™ Resin 828

Introduction
This accelerated one-package Epoxy/DICY adhesive, properly formulated, can yield over three months pot life when stored at normal room temperature, yet develops good bond strengths on relatively short cure schedules of 30 minutes at 149 °C or 40 minutes at 135 °C.

Suggested Uses
- Automotive trim adhesives
- Aircraft adhesives
- General purpose industrial use

Application
All surfaces to be bonded should be free of dirt, oil, grease, or other contaminants to insure maximum adhesion. Apply adhesive to both surfaces to be bonded and cure at 135 °C or above. Contact pressure is adequate for development of maximum bond strength.

Storage
Recommendations regarding storage conditions can be obtained by visiting our web site at www.hexion.com

General Information
These are starting formulations and are not proven in the user’s particular application but are simply meant to demonstrate the efficacy of the products and to assist in the development of the user’s own formulation. It is the user’s responsibility to fully-test and qualify the formulation.
