

Hexion Inc. and ADDAPT Chemicals BV Announce New Hybrid Polymer System

February 21, 2019

Pernis, the Netherlands - (February 21, 2019) – VeoVa™ vinyl ester monomer, a Versatic™ Acids & Derivatives product from Hexion Inc. (“Hexion” or the “Company”), is one of the key components in a new specialized hybrid polymer technology developed by ADDAPT Chemicals BV for the paint and coatings industry. The Addapt VeoPox™ products are novel adhesion promoters for use in various technologies and substrates, offering improved adhesion and corrosion protection.

ADDAPT Chemicals BV, an independent chemical company located in the Netherlands, leveraged Hexion's VeoVa™ vinyl ester monomer as a reactive diluent, to develop a novel adhesion promoter for, among others, DTM (direct to metal) systems. VeoPox™ significantly increases adhesion and anti-corrosion properties.

The synergistic effects of the VeoPox™ hybrid polymer systems enables formulators to develop new higher performance systems, overcoming limitations and shortcomings of existing polymer systems. The VeoPox™ range is applicable for epoxy, alkyd and acrylic binder systems, both solvent and waterborne.

“Hexion was pleased to cooperate with ADDAPT Chemicals BV to facilitate developing the novel VeoPox™ range, to create an excellent adhesion promoter and corrosion protector for the protective coatings and industrial paints industry,” said Harold Schweitzer, Vice President and General Manager, Versatic™ Acids & Derivatives. “Importantly, the VeoPox™ range enables customers to develop state of the art technologies that meet the growing need for more sustainable solutions in response to recent stringent legislation in Europe, combined with excellent physical properties of the coating.”

About Hexion

Based in Columbus, Ohio, Hexion Inc. is a global leader in specialty chemicals. Hexion Inc. serves multiple global markets such as the automotive, paints, coatings, wood and industrial markets through a broad range of specialty products and technical support for customers. Hexion Inc. is controlled by investment funds affiliated with Apollo Global Management, LLC. Additional information about Hexion Inc. and its products is available at www.hexion.com.

About ADDAPT Chemicals BV

ADDAPT Chemicals BV is an independent chemical company located in the Netherlands and specialized in the development and manufacturing of environmentally friendly additives for a wide variety of mainly water based systems. In-depth knowledge of additives makes ADDAPT Chemicals BV a respected and reliable 'GLOCAL' supplier and enables them to offer you creative and often innovative solutions. www.addapt-chem.com
